

GATEKEEPER

Putting you in charge of your property

Is it safe to give **keys** to your security company?
Is it safe to give your domestic worker a remote ?
 Is it safe to **fit a key-pad** (the weakest link)

The answers are all "NO"

GATE-KEEPER

You control the list of who may enter your property and you will know when they do it. You can delete unwelcome people from your list – anytime at no cost.

How ?...

Log on to www.gate-keeper.co.za, enter your username and password... the rest is self explanatory.

How does it work ?

Dialing your gate from any phone with a missed call, triggers the opening mechanism of the gate, provided the unit recognizes the identity of the incoming call.

When you purchase a Gate-Keeper, the units cell number, when entered for the first time, allows you to register the unit, create a user name and password and create a profile for your Gate-Keeper.

The profile allows you to select your Security Company, add family and friends and created schedules for your domestic staff to come and go during allotted working hours.

Additional benefits

Simple... simple... simple

- You may log in and change access list anytime
- Know immediately by email when someone on your approved list accesses your property
- Know if your gate is left open
- Know if your gate motor cover is removed

Did you know that the "key pads" on the outside wall is the weakest link in a home's security?

For obvious reasons we won't advertise why we say this but if you would like a demonstration or explanation, please let us know.

Price

R2835 + vat (excluding installation)
Annual Sim and Data charge : R300.00 + vat

Why is there an annual fee ?

The Gate-Keeper is supplied with one of our contract SIM cards. Part of the service package provided includes the monthly fee associated with this SIM card and providing web access to your Gate Keeper. Its Cheaper than buying remote controls for staff and kids etc !

Installation

Installers quote anything from R 250.00 to R 350.00 to fit gate-keeper. The installation is very simply and you could do it yourself. We are willing to guide you over the phone if necessary.

Technical hotline : 082 781 0063

The device is only 30X50X75 mm and fits easily under your gate motor cover. It draws its power from the gate motor's battery and uses only 30mA.

Where do I get it ?

From us at 395 Main road, Kirstenhof, Cape Town or from Elvey Security Technologies.
